

The NEC IT1825

The Document Communicator

Empowered by Innovation

NEC

The NEC IT1825 All-in-one document solution

The digital copier,
printer, scanner, fax,
network fax, IP,
email, Internet
document
communicator.

Don't settle for print
and scan. Share your
documents via a
variety of mediums,
including PC, net-
work, IP, email and
the Internet.

It's Friendly

With its 18-cpm digital engine and full 11x17 inch (ledger) size capabilities, the NEC IT1825 is perfect for workgroups and offices that require a variety of ways to distribute their document information. The beautiful design of the new NEC IT1825 is a backdrop for a large easy-to-operate touch screen, while its easy access and wingless design offers accessibility and convenient space usage.

It's Productive

Found normally on high-end units, the NEC IT1825 touch screen offers fast access to operation features and an easy-to-use QWERTY keyboard for

email addressing and naming functions. Because of its fast learning curve, users make fewer mistakes and achieve productivity quicker. The unique panel also tilts so you

can customize the angle for your preferred access position.

It's Clear

The high-end, platen and automatic duplex document feeder provides fast input and high-resolution output for high quality copies, great image scanning and high resolution communications. Quick changing universal cassettes hold up to 11 x 17 inch

ledger-size paper. The unit automatically recognizes the paper size you have loaded. With four available paper sources, the unit provides up to a 1750-sheet capacity.

Front Access and Consumables

Self-contained consumables on the NEC IT1825 make it easy to replace toner and consumables without all the mess.

It's Facsimile

Your NEC IT1825 offers up to two fax ports for simultaneous sending and receiving, doubling your fax power with the highest fax speeds available (super G3 at 33.6 bps with JBIG coding). With the unit's ability to integrate network applications, incoming faxes can be automatically archived to a file on the network or to a user's email. The

NEC IT1825 can also archive all incoming and outgoing fax traffic in PDF or Tiff formats. As an added security feature, your unit can store incoming faxes in the memory during designated time periods.

PRINTING

For great network and PC printing, the NEC IT1825 offers PCL6 and PostScript printing at up to 11x17 ledger output with printer management software. Features include watermarks, forms and image overlay, page numbering, time and job names, labels and poster mode to name a few.

SCANNING

Duplex scanning provides PDF and Tiff format conversion network file scanning to your desktop and your document management software. NEC special Image-Receiver software

automatically sorts your scanning for easy filing and easy integration to your document management software.

EMAIL COMMUNICATIONS AND INTERNET FAXING

The QWERTY keyboard and up to 810 one-touch keys makes it easy to send emails. Email integration means you can email a paper document from your unit. Fax worldwide with no phone line cost when sending to other Internet fax-capable units.

NETWORK FAXING

The NEC IT1825 becomes your network fax hub. Simply send from your desktop PC and the NEC IT1825 will route faxes for you.

IP COMMUNICATIONS

Send documents from the NEC IT1825 directly over your IP network and use your Intranet security to protect your information.
